DESCRIPTION

The VASO series is a set of pendant lamps that combine subtle design with functionality. Models are available in Smoked, White, and Amber, and their glass and metal shades give them a unique character. They emit a warm 3000K light, creating a pleasant atmosphere in any interior. The adjustable height of selected models allows them to be adapted to various arrangements, while a 120° beam angle ensures even illumination of the space. Their lightweight construction facilitates installation, and the robust materials ensure durability. The VASO collection is perfect for living rooms, dining rooms, or bedrooms, adding a unique charm to any interior.
