

Ceramic Cone Pendant

Ceramic Cone Pendant is a simple, focused light with a matt, fine-textured surface in unglazed clay.

Each shade is cast and fired individually, giving natural variations in form, size, and colour that make every piece unique. For the coloured versions, the first layer of white porcelain is poured out early and replaced with a tinted clay. This gives the shade its light ochre or warm umber exterior. The white version stays slightly translucent and glows gently in the evening, while the coloured versions remain opaque and cast a warmer, more focused downlight.

Defined by its clean cone form, the pendant provides calm, direct illumination for dining areas, counters or smaller spaces where focused light is needed.

Dimensions

19 x 19 x 12 cm (L x W x H)
