

INSTALLATION MANUAL EN

Installation may require the advice of a qualified person.
The product can be used outdoors when the IP44 or IP54 symbol is visible on the luminaire. In other cases, the product should only be used indoors. The lamp, in which wooden elements were used, may only be installed in heated rooms.
Only light sources with the maximum power specified on the type plate and close to the lamp socket may be used for the product.
It is recommended to use a YDY 3 x 1.5mm² power cable in a double buffer zone.

Mounting the lamp on the ceiling:

1. Disconnect the power supply.
2. Remove the screws that secure the base.
3. Disconnect the 6mm power cords and pass them through the grommet with the grommet.
4. Screw the U-foot to the floor with the appropriately selected screws.
5. Connect the power wires to the appropriately labeled terminals on the connector - live (L) brown and neutral (N) blue.
6. Install the connector body so that the continuity of the double insulation is maintained.
7. Screw the headliner to the C-Base.
8. Make a plywood lampshade as shown in fig 4,5,6.

Maintenance:

Work related to maintenance and bulb replacement should be performed with the power disconnected and after waiting for the bulb to cool down. After disassembling and disconnecting the power supply, clean the lampshade with a soft cloth.
