

PAULEEN PORTABLE MAKEUP BOX

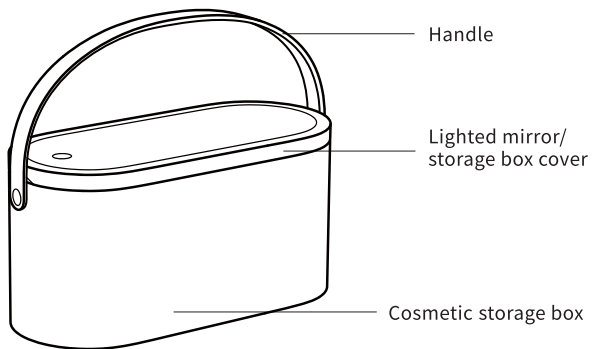

Manual

V1.2

- Please read this instruction carefully for a better use and save this instruction and the warranty card for further reference.

Product introduction

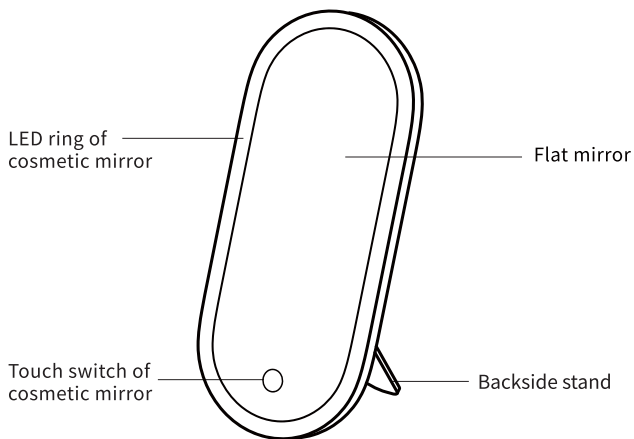

EN

Paileen Portable Makeup box

The upper cover of the box and the lighted makeup mirror can be used separately.

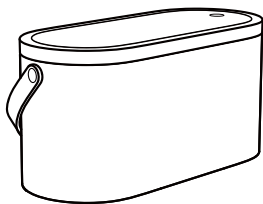

The flexible handle makes it more comfortable and convenient to carry. The storage box is specially designed for users to store daily cosmetics.

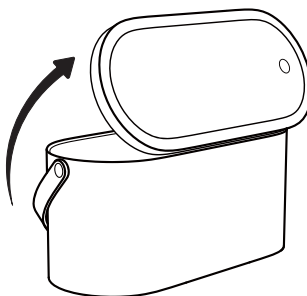

Lighted mirror

The top cover of the cosmetic box is also a lighted makeup mirror. The special professional makeup lights are placed all around the mirror's outer edge to suit the needs for makeup.

Open cover mode

Normal configuration

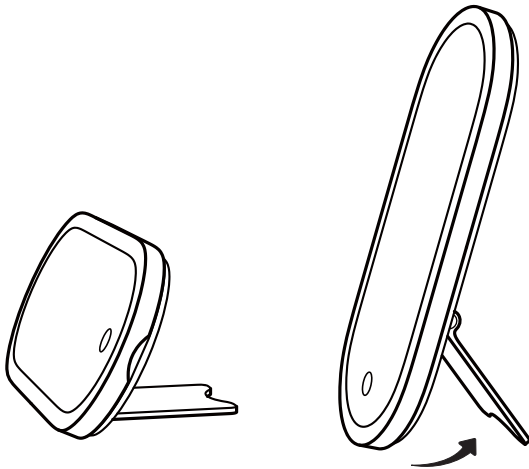

Flip up the mirror surface to open the top cover

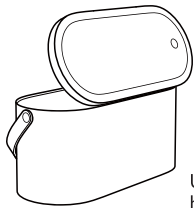

The cosmetic mirror can be opened by flipping up one side of the top cover. It can either be used directly or removed from the box and used independently.

Note: this kind of cover-opening method can work only on the specific side; in case the top cover fails to be opened, please try on the other side.

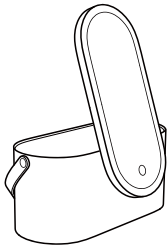

The holder

The backside stand allows users to place the mirror in different ways. Since the mirror surface can be rotated, the mirror can be placed horizontally or vertically.

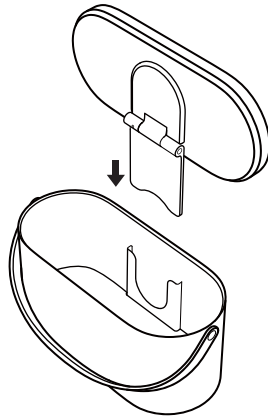

Use the box horizontally

Use the box vertically

It can be embedded for more convenient use

A mounting is designed at the inner wall of the storage box. Users can place the cosmetic stand into the mounting and adjust angles by rotating the mirror. They can choose to use it horizontally or vertically. Users just need to flip down the cosmetic mirror when their making up is done or during travelling.

Instructions

The top cover of the box is also a lighted make-up mirror. The special professional lights being placed all around the mirror are especially designed for make-up artists, so the mirror is perfectly suitable for making up. The lights have a memory-storage function. When lights are turned off and then on, the lights remember the brightness they were adjusted to when they were used at the last time.

Light switch

Single touch: turning on/off the cosmetic mirror light. long-time touch: regulating the light intensity.

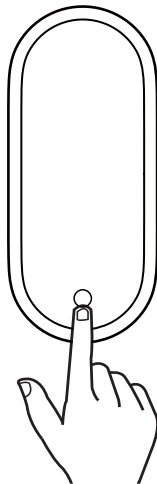

Travel function

When the light is off, keep the switch pressed-long enough until the light flashes once then unlock/lock the screen.

Low-battery warning

If the lights flicker twice when the lights are turned off, it indicates that they are in low power and need to be charged.

Other accessories (shakeproof felt pad)

To prevent the box from slipping and sliding, a piece of felt pad is placed at the bottom of the storage box. This ensures a stable stand of the box.

Safety precautions

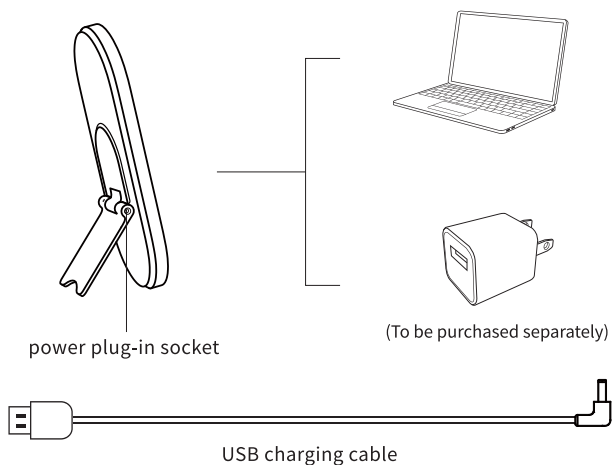

1. Don't disassemble, repair or refit this product.
2. Don't put water on it or use the box with wet hands.
3. Don't use the box in high temperature and high humidity environment.
4. Please avoid strong vibration, impact, or pressure to prevent breakage.
5. Do not pour water or other liquids on the cosmetic mirror lights
Otherwise they will be damaged.
6. Don't put the product on an uneven surface or unstable table to avoid the box to fall down.
7. If anything unusual occurs, please stop using the box.
8. To avoid eye injury, do not look at the light source for a long time.
9. Do not install the movable parts of this product by force to avoid damage.
10. Adapter NOT included, please buy a standard adapter (DC5V 1A).

Product features

- Our versatile product can be used at home and for travelling.
- The portable cosmetic box can be used for storing cosmetics and be placed e.g. on tables. Also the top cover can function as storage place when turned upside down.
- The flexible handle makes it more comfortable to carry the box, also while travelling.
- The backside stand allows users to place the mirror in different ways. Since the mirror surface can be rotated the mirror can be placed horizontally or vertically.
- A mounting is placed at the inner wall of the storage box. Users can put the stand of the cosmetic mirror into the mounting and adjust angles by rotating the mirror. Users can choose to use the mirror horizontally or vertically.
- This product combines a make up mirror and make up lights into a lighted make up mirror. The professional make up lights circle the mirror's outer edge.
- High definition LED lights with a color rendering higher than 90 were selected to show the true skin colour.
- The make up mirror lights are equipped with a touch-sensitive switching mechanism. The lights switch off when being touched quickly. The brightness of the lights can be adjusted by pressing the switch for a longer time.
- When the lights are turned on again they remember the exact brightness which has been adjusted when being used for the last time.
- The make up box is especially designed for travelling. When the lights are off, the switch needs to be touched for a long time in order to unlock or the screen.
- The make up mirror lights emit white light with a warm colour temperature of 5500 K to make it look more natural for making up.
- The make up mirror lights are energized by built-in 1500 mAh lithium batteries. These batteries are rechargeable and can be used without direct power supply. This makes making up much easier and independent of a fixed location.

Power supplies mode

The built-in lithium battery can be used with or recharged via USB cable adapter/computer, so it can be used without direct power supply. When the power is turned on, the lights will blink twice slowly if they need to be recharged.

Specifications

Item name	PAULEEN PORTABLE MAKEUP BOX
Item No.	480.76
Materials	ABS+PC+TPE
Size	230mm×105mm×115mm
Weight	592g
Rated voltage	5V \approx 1A
Rated power	5W
Battery capacity	1500mAh
Color temperature	5500k White light
CRI	\geq 90
Color	Pink

Warning Do not disassemble the product.
