2217/L/1/BI **biconica**

design elio martinelli, 1987

Standing lamp indirect light. White or black moulded resin lacquered structure. Now presented in the new "golden" finish. With light intensity regulator on the cable. LED light source integrated. Complete of electronic dimmable driver.

Designed by Elio Martinelli in 1987the lamp was created by the vacuum geenrated by a ring of nearly tangent circles, forming a canal that connects the two worlds: the old and the new millennium. The neoclassical form allows the inclusion in any type of environment and small size is not an issue for its location.
