

A technical drawing of a cylindrical object. The object consists of a main cylindrical body with a slightly tapered top edge and a distinct flange at the bottom. A large, thin, elliptical ring is tilted at an angle, centered on the top surface of the cylinder. A smaller, similar ring is positioned directly above the center of the main ring. Three dimension lines are present: a vertical line on the left indicating the height, a horizontal line at the bottom indicating the diameter, and a diagonal line indicating the diameter of the tilted ring.
