BESCHREIBUNG

An extreme geometric synthesis of optics par excellence, Nur manifests its presence through a monolithic and mono-material body. The essential and geometrically calibrated lines of a perfect parabola conceal an optical heart that perfectly controls the emission, without offending direct vision. With a 45W LED optical engine, it ensures general ambient lighting thanks also to indirect emission. In the WHITE INTEGRALIS version, compatible with Artemide App, Nur is designed to offer a white emission ensuring perfect perception while respecting the human presence and which at the same time combines control of microbial growth. It can vary in intensity and is available with a fixed CCT of 5000K, with a high color rendering index (CRI 90).
