BESCHREIBUNG

A floor lamp with indirect diffused emission, whose minimal footprint is the main feature of the project. Two identical thin discs at the base and top are connected by a slender tubular stem. Its minimal elegance makes it a timeless object. Its simple forms are ideal for any public and private environment and match with any style. In the WHITE INTEGRALIS version, Athena is designed to offer a white emission ensuring perfect perception while respecting the human presence and which at the same time combines control of microbial growth. It can vary in intensity and is available with a fixed CCT of 5000K, with a high color rendering index (CRI 90).
