Gejst accepts no responsibility for any products that have been modified or tampered with.

This product is designed for indoor use only.

TECHNICAL DATA

This product is a LED Dimmable Light Tube App Based, warm white LED Tube, 3000/6500 Kelvin. Average lifespan 25.000 Hours.

Please NOTE to place the electrical end towards the end of the lamp where the power is connected.

Content of the box

GEJST

- ① Insert LED Dimmable Light Tube in your lamp.
Please make sure to place the LED tube with the L and N towards the end of the lamp where the power is connected.

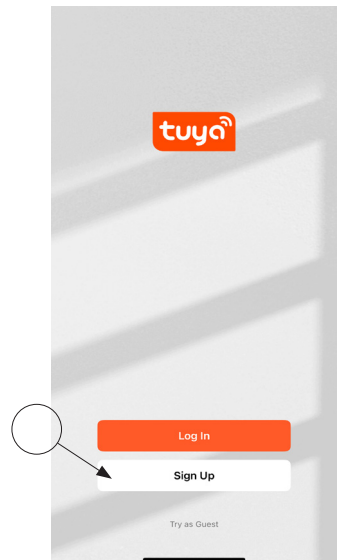

Fasten the LED tube by holding the lamp and turn the LED tube with your thumbs 90 degrees.

- ② Download **Tuya Smart** app on App Store or Google Play.

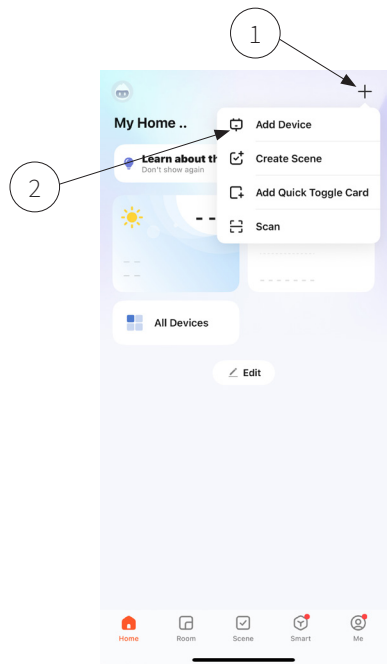

- ③ Ensure that your phone is connected to the Wi-Fi.

- ④ Open **Tuya Smart** app and press "Sign up" to register an account, if you do not already have an account.

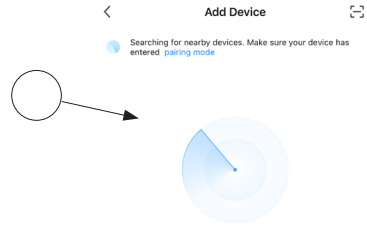

- ⑤ Turn on your lamp. When it is your first time connecting, the LED Tube is blinking.
If the LED Tube is not blinking, please turn it on and off 3 times, and then wait 3 seconds.

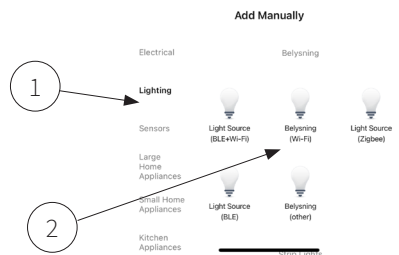

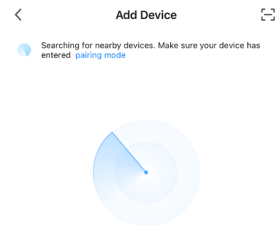

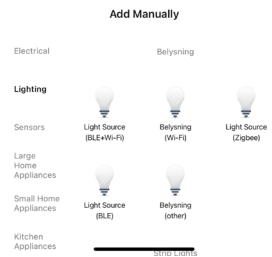

- ⑥ Tap the "+" button on the app and then press "Add Device".

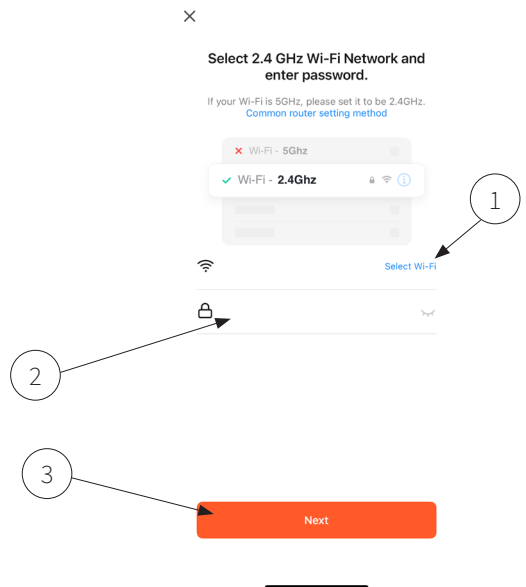

- 7 Choose the light tube that is showing automatically after Tuya Smart app has searched for nearby devices.
If your device has been found automatically then skip to step 9.

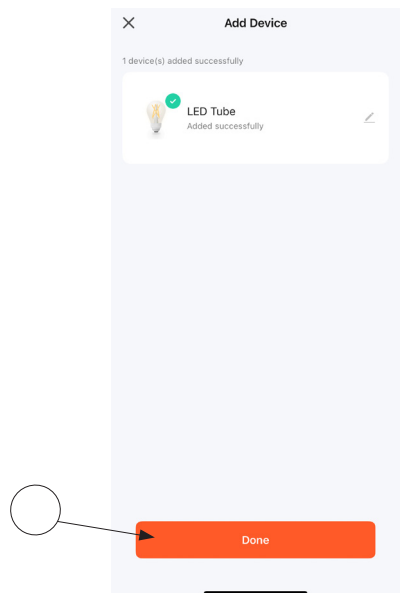

- 8 If the LED Tube is not showing you can manually add the device by tapping the category "Lightning" and choosing "Light Source (Wi-Fi)".

- ⑨ Select your Wi-Fi and enter your Wi-Fi password.

- ⑩ Your LED device is now added successfully. You can rename the device now or choose to do it later. Press "Done".

GEJST

- ⑪ When the light is added successfully, you are now able to control your LED Dimmable Light Tube.
