Built in LED 14W

Cleaning instructions

Product may be cleaned only after it has been switched off and cooled down.

Prevent moisture from getting to the lamp connections or power supplying elements.

Wipe the surface with a soft, dry cloth.

We do not recommend cleaning agents as they can cause staining.

After cleaning, the lamp should be left off until it dries completely.

"Melt is a visual story of playfulness, contrast, and illusion. It's a fun take on the classic fluorescent tube—a familiar shape, now reimagined in a "melted" form.

The glowing tube appears to float on two thin cords, as if by magic, with no visible power source. And finally, the mix of two different styles: simple geometric shapes meet the soft, flowing form of the melting light."
