

807/J/BI elica

design brian sironi, 2009

Table lamp with adjustable direct light, structure in white lacquered aluminium. On the occasion of the 10th anniversary of its production, Elica is available in the new brilliant black color version. The lamp lights up and switch off by the rotation of its arm. LED light source integrated. Electronic driver on the plug. Available in two sizes.

Designed by Brian Sironi in 2009. The movement creates light, by rotating the arm ELICA does not lift from the surface but lights on and off, there are no switches that can alterate the harmony of its form, it is an helix of pure light as a fun game takes flight to the imagination and fantasy.
