

Sustainable lamp: Kalahari

- fitting: E27
- material of shade: natural wicker
- light bulb: **only use energy saving light bulb or led lamp** of max. 12Watt CFL
(=equivalent of 60Watt incandescent light bulb)
- pendant: packed separately (depending on model this may vary from picture shown)

About the material of shade: wicker is the term for woven furniture of cane-like materials of a plant such as reed, willow, rattan and bamboo. The Kalahari is made of willow and is completely biodegradable and therefore better for our planet.

Each shade is individually handcrafted and no two pieces will look exactly the same.
