

## INSTALLATION MANUAL ANG

A qualified person may be required for installation. The product can be used outdoors if the symbol is IP44 or IP54 on the luminaire, in other cases the product should only be used indoors. If the symbol of the second protection class is on the label, the luminaire does not need to be connected to ground. A lighting fitting in which wooden elements are used can only be installed in heated rooms. Only light sources with maximum power as described on the nameplate and in the vicinity of the frame may be used for the product. It is recommended to use a 2 x 1.5 mm<sup>2</sup> YDY power cord in a double cover.

### Assembly:

1. Connect both parts of the lampshade with the plastic nut.
2. Unscrew the mounting screws on the sides of the beam and pull out the base.
3. Unplug the power supply.
4. It insulate the power cables for a length of 6 mm.
5. Screw the U-foot to the floor with the appropriately selected screws.
6. Connect the power wires to the appropriately labeled terminals on the connector - live (L) brown and neutral (N) blue.
7. Install the connector body so that the continuity of the double insulation is maintained.
8. Screw the headliner to the C-Base.

### Maintenance:

Works related to the maintenance and replacement of the bulb should be carried out with the power supply disconnected and after waiting until the bulb has cooled down. After disassembling the lampshade and disconnecting the power supply, clean it with a soft cloth.
