|---|---|---|---|
| **Product Category** | Pendant | **Recommended Bulb** | |
| **Material** | Stainless steel, polycarbonate | Beads works with a variety of different LED bulbs. | |
| **Cable** | 4m, clear PVC cable | LED globe bulbs 500 – 800 lumen output and from 2700K – 3000K colour temperature. These styles are particularly effective in the white colour and in the metallic options for a softer less reflective look. | |
| **Ceiling Rose** | Hemisphere. Colour matches the product | | |
| **Lightsource** | UK/EU E27 Max 100W, USA Max 100W (not included) | LED filament style bulbs will bring out the reflective qualities of the metallic finishes brilliantly. Best performance would be from 600-900 lumen output with 2200K – 2700K colour temperature | |
