DATASHEET WORKSHOP DIFFUSER

The semi translucent diffuser and the bracket fits the socket and the bulb, without any changes to the exterior. It is naturally springy and will hold the diffuser without any use of tools or screws, making the bulb easy to change. The diffuser is designed to minimize collection of dust, but leaves enough room for the air to flow. It creates a nice even light spread on all kinds of surfaces, and guarantees there is no glare from the lightbulb.

Delivered mounted.
