BESCHREIBUNG

Discovery is an unobtrusive, utterly absent and immaterial element. Its volume is only perceived when switched on, thanks to the light that outlines the central emitting surface. The result is a uniform light, ideal for working environments. The company's great optoelectronic skills, combined with a thorough culture of design and with technological know-how, produces a perfectly all-purpose and surprising solution, which translates innovation into emotional perception. In the version WHITE-VIOLET INTEGRALIS, Artemide App compatible, Discovery is designed in two operating modes: Day, with white light performance for a microbial growth control, and Night, with a violet light emission for a faster reduction of the bacterial load, in particular for photosensitive pathogenic bacteria.
