The symmetry of tall grown, succulent ensembles inspired French designer Mickaël Koska to form an illuminating sculpture for living spaces. His work with Cactus underlines what he calls “to give life to surprising natural creations”, preferring simple lines and focus on the essential.

## PRODUCT CHARACTERISTICS

Cactus is a masterwork of traditional craftsmanship. Each lamp is handmade and has characteristic features such as irregularities in glass thickness, colour variations, small bubbles or bumps in the glass.

*Lifetime:* 20 000 h  
*Colour temperature:* 2700 K  
*Finish:* warm white  
*Lumen:* 1600 lm

## CARE INSTRUCTIONS

Regular cleaning and maintenance is important in order to keep your pulpo product looking its best and to prolong its life. Always remove any kind of dirt as soon as possible. We recommend that you first test a small, invisible area to ensure that no colour change or damage arises to the product. Do not use materials for maintenance that contain abrasive agents or are basic, acid or organic.

## GLASS CLEANING

For dusting and light cleaning of glass use a soft, dry cloth. For further cleaning gently wipe the surface with a soft cloth wrung in clean water and a non-abrasive commercial glass cleaner. Dry immediately afterwards with a soft, dry and clean cloth. Please note that bubbles, streaks and other variations in size and colour are part of the production process, and not defects of the design or production of handmade glass.

## METAL CLEANING

For dusting and light cleaning of the centerpiece, use a soft and dry cloth. For further cleaning, gently wipe the surface with a soft cloth wrung in clean water and a neutral detergent or soap flakes of good quality. Dry immediately afterwards with a soft, dry and clean cloth. For the best maintenance of the product, care for it regularly, protect it against direct sunlight and heat, and try to keep it away from moisture, grease, and other dirt. Furthermore, protect the surfaces against sharp objects and other that might scratch. Please note that brass may develop a patina over time. The darkening of the surface is due to oxidation. If left untreated, the surface will eventually turn entirely darker.

## IMPORTANT NOTICE

When moving your Cactus lamp, please hold it only by the metal centrepiece and move it to the desired location. Never lift it by the glass shade or slide it across the floor.

The lamp should only be connected or repaired under the supervision of a qualified electrician. Please observe all local regulations. For interior use only to avoid short-circuit. Before changing the light bulb, turn off and unplug the lamp, and allow the bulb to cool down. Defective parts maybe replaced only with authorized parts. Damaged external wiring may be replaced only with special wiring or wiring available only from the manufacturer.

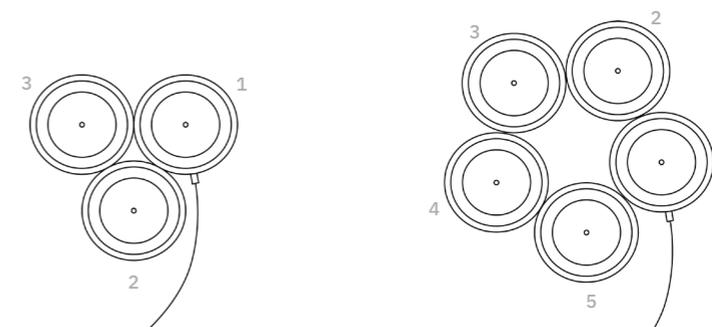

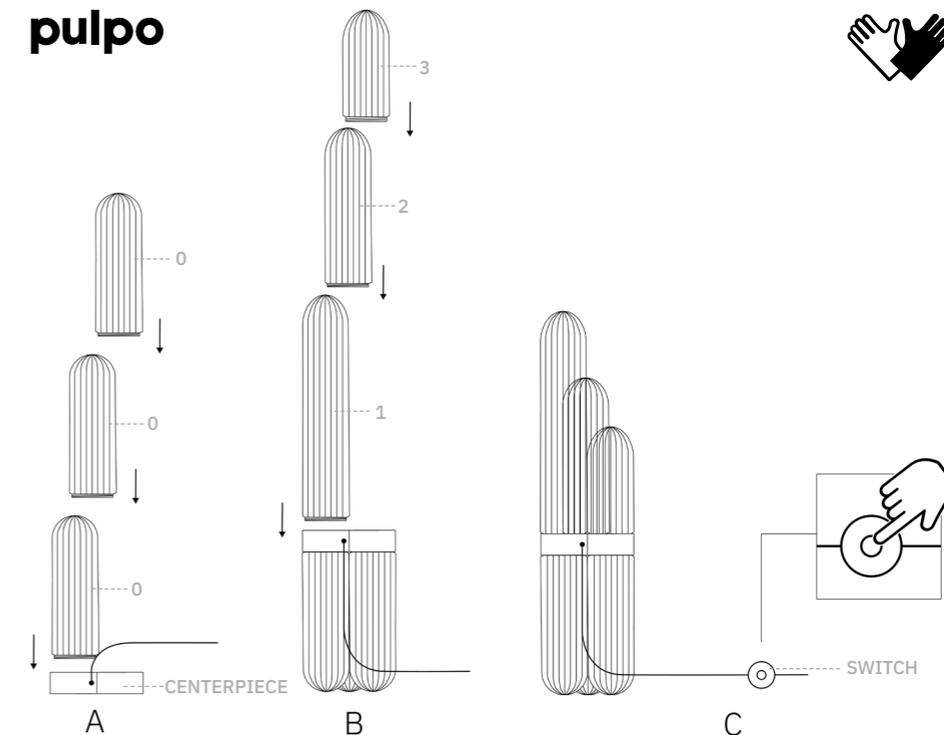

## INSTALLATION OF THE LIGHT

- Place the centerpiece in the desired position, carefully screw the three (or five-if cactus big) shades number 0 into it one by one.
- Turn the lamp to the opposite side and balance it by screwing the shades to the left or right. Carefully screw the shade number 1 on top of the centerpiece. Screw the shade number 2 and 3 in the other parts of the centerpiece (+ shades 4 and 5 for cactus big).
- Plug in the cable and turn on the lamp by pressing the switch once. Press and hold this switch in order to change the intensity of the light.

CE (European Union) pulpo GmbH hereby states that this pulpo product conforms to all European Directives and Standards, including 2006/95/EC. The Declaration of Conformity is available from pulpo upon request. WEEE-Rg.Nr. DE 25847841
