OMNI WALL LAMP

Designed by Søren Ravn Christensen

Designed by in-house designer and Chief Creative Developer at UIMAGE, Søren Ravn Christensen, Omni wall lamp creates a light that will gracefully dance across your walls:

"Embracing form and function in a symphony of brass and dotted lines of light, the Omni wall lamp will cast a soft light on everything from your bedside to the painting on your walls."

With multifunctionality and flexibility at the heart of the design, the Omni wall lamp can effortlessly rotate 360 degrees, allowing you to frame the light to suit your desired ambience. Whether you prefer a horizontal or vertical orientation or something in between, the Omni wall lamp adapts to your space, offering complete control over the direction of the illumination. The dimmable feature, located on the base of the lamp, allows you to tailor the light, taking the flexibility of the design even further.

The versatile design of the Omni wall lamp makes it the perfect lighting solution for various settings. Whether you are looking to cast a welcoming light in the hallway at home or looking to add a touch of sophistication to a hotel, bar, or restaurant, Omni wall lamp effortlessly enhances any environment, at home and in public spaces, bringing you light as the seasons change and days grow shorter.
