

Olimpia _table

Olimpia is a battery-operated portable and rechargeable table lamp. It is the only model in the "Zafferano Lampes-à-porter" collection with a mouth-blown, satin opal glass diffuser; this spherical element, that emits diffused light in the space, is supported by a slightly rounded, truncated-cone aluminium structure. Olimpia is available in various finishes: white, dark grey, chrome, gold and copper. The colour of the light can be varied using an amber filter to be positioned on the light source. Like the other models in the catalogue, Olimpia has a LED light source, which can be dimmed using a touch button that also controls the on/off function. It can be recharged on the special pad, and its lithium batteries are replaceable. It can also be safely used outdoors, thanks to its IP54 rating. Set at maximum power, Olimpia emits light for about 9 hours. It takes about 9 hours (at 1A) to fully recharge the batteries.

LED dimmable IP54
