INTERCONNECT CANDLE HOLDER, SMALL
Designed by *Colin King*

INTERCONNECT CANDLE HOLDER, SMALL
Designed by *Colin King*

*The bold Interconnect design
is redefined in a new size and finishes.*

Designed by Colin King for Audo Copenhagen, the Interconnect Candle Holder is equal parts functional item and bold sculpture, ingeniously combining a sphere, an angle and a line to transform the design into a striking focal point.

Its exaggerated proportions are now reduced to a smaller size without compromising its visual impact. Available in bronzed brass, black powder-coated metal or polished steel, each finish adds its own distinctive expression to the design, becoming more beautiful with time and use.

The simplicity of the Interconnect Candle Holder speaks volumes. It is both a source of cosy candlelight and a sculptural object with a life beyond its intended use. When candles are lit, it transforms into an artful source of illumination, casting shadows and creating a captivating play of light. The original large-format Interconnect Candle Holder is available in bronzed brass, polished brass and black powder-coated metal.

About the Designer

Professionally trained as a dancer, Colin King found himself at the intersection between a dancer's awareness of space and a stylist's impulse to bring it to life before foraying into the realm of product design. Currently based in Tribeca, New York City, he balances being on set, styling and designing from his studio. Colin has styled for major publications such as Architectural Digest and T Magazine and hosts myriad clientele within product and interior design. He is continuously inspired by life's everyday rituals, gestures and imperfections—made beautiful by their ever-evolving presence within a given space. Colin King is the designer behind Interconnect, Audo's monumental candle holder design with the same fundamental ethos that guides its own creative direction: a simplicity that carries bigger ideas.
